

HID

Retransfer Printer Technology

The next generation of print-on-demand solutions.
With brilliant color and great image quality

The next generation
of smart card applications.

The HDP6600 offers the versatility to meet your card application needs today and in the future. With add-on dual-sided printing, encoding and lamination modules, the system's flexible architecture lets you expand or reduce production instantly. For greater system capacity, an optional dual-card input hopper lets you easily manage multiple card types and higher card volumes, expediting even the biggest production jobs. For one-step, inline printing and encoding, HID Global offers multiple, field-upgradable encoder options. The HDP6600 also includes an impressive 1GB of memory and a comprehensive set of integration tools, making it easy to use and easy to maintain with only minimal training. Finally, because the HDP6600 easily integrates with other products within the HID Global portfolio, you can leverage your existing Genuine HID Technology™ investments.
